Madgwick for Students

UNE has developed an Artificial Intelligence platform for UNE students to access during their study.

Madgwick Student is designed to:

- Give students free and equal access to AI Technology, including multiple premium AI models to choose from
- Give students a space to plan their work, create images and text, and explore ideas
- Protect students by detecting and flagging harmful or unsafe content
- Allow students to create their own assistant they can train for specific tasks
- Give students private interactions that will not be used to train any AI

The platform includes short mandatory training before students can access the AI platform. This highlights how students can use the AI safely and responsibly.

For more information on AI use in assignments check out our [fact sheet](#) on UNE's Assessment Structure.

You can access Madgwick Student through MyLearn by visiting the [Madgwick Student Information Hub](#).

Madgwick Mentors

Want some help developing your AI skills? Madgwick Mentors run regular Drop-in Workshops which are free and confidential. You can find a list of upcoming Drop-in sessions and further information about Madgwick Mentors [HERE](#).

UNE's Peer Academic Mentors (PAMs) are also trained to help students with Madgwick AI. PAMs with higher level of Madgwick AI skill have a green Madgwick seal on their profile. You can book a one-on-one session [HERE](#).
